Clear Voices, Flawless Meetings, Sound Tracking

Multi-Touch
40 points touch, Smoother Collaborative Writing

All-in-one solution for local/remote meetings,
4K wireless screen sharing & smart collaboration,
enabling seamless efficiency across all scenarios.

Air Gesture

Supports touchless gesture control. Users can perform commands like flipping pages, returning to the homepage, and taking screenshots without touching the screen, using simple hand gestures.

AI Camera

This AI camera with built-in intelligence can recognize and analyze scenes in real time, automatically performing tasks such as sound source tracking.
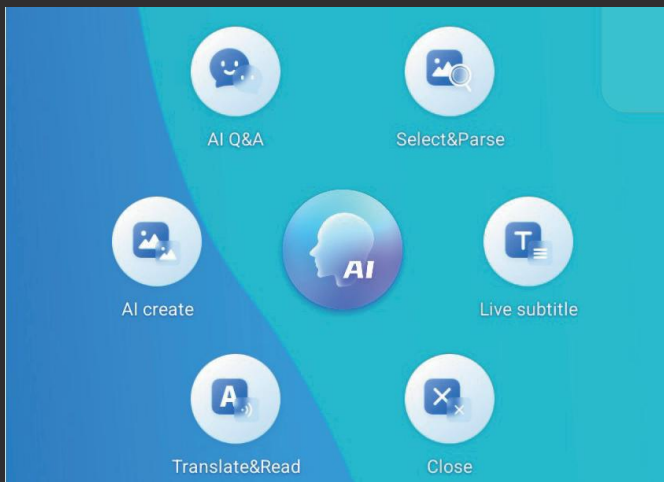

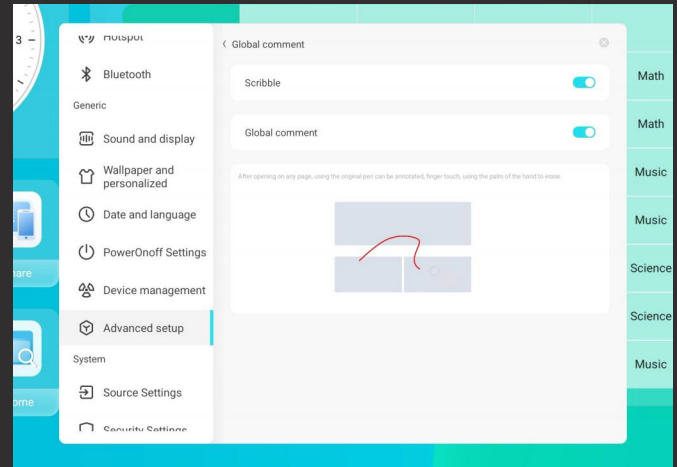

Customizable Interface

This feature enables users to customize the interface layout, background, and tool positions based on personal preferences, enhancing efficiency and creating a personalized workspace.

Global Annotation

The pen is for writing, and the finger is for touch. You can annotate and control the large screen at any time without switching (except in the whiteboard software).
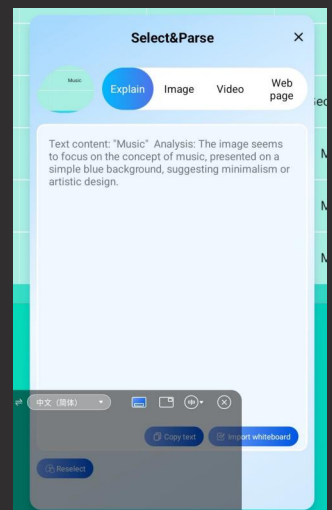

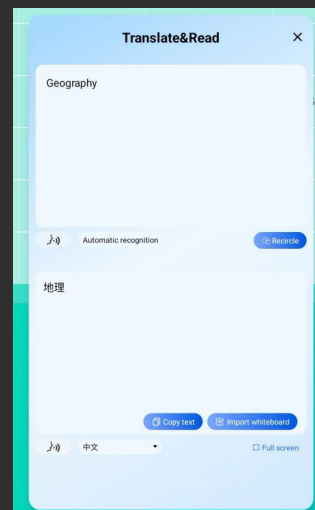

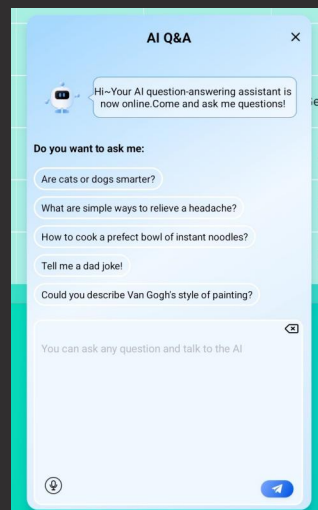

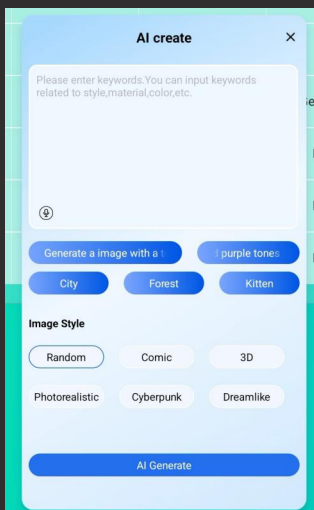

Scribble

In the browser search bar, the text written by the stylus in the blank area can be recognized and typed into the search bar.

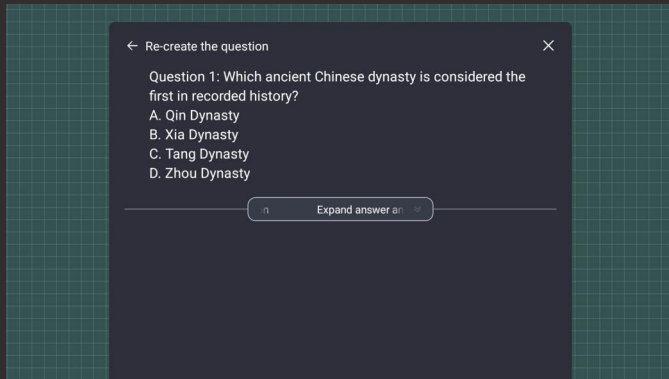

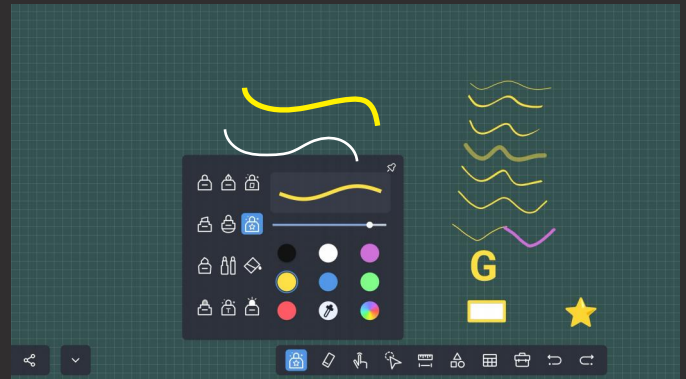

AI Software

Embedded AI software supports smart Q&A, AI image generation, real-time translation, and more, enhancing productivity and user experience.
